Visual Arts education is increasingly more relevance in our visually literate society and a significant subject in the curriculum for students to develop deeper learning about themselves and the world they live in.

Marrickville Intensive English Centre has a vigorous learning environment and our students participate in a Visual Arts program where they learn to use English language to discuss and respond to art and learn about the enjoyment of making art. The Visual Arts program aims to enable students to move towards linguistic, conceptual and creative autonomy.

As part of our ongoing commitment to a rich learning program all students participate in Visual Arts excursions to significant exhibitions and galleries, external workshops, community projects and special skills classes. In 2012 MIEC students took part in the Art Gallery of New South Wales OPENgallery education program, Sculpture by the Sea education workshop and exhibition, Compass Sydney University Film production and editing program and Sydney Biennale excursion and education tour.
